PROFESSIONAL SUMMARY

Enthusiastic Software Engineering student with a strong interest in full stack web development. I enjoy building responsive and scalable web applications using the MERN stack and continuously improving my problem-solving skills. Looking forward to contributing to a dynamic team and growing as a professional developer.

EDUCATION

Bachelor in Software Engineering

2025 – 2029

University of Engineering and Technology (UET), Lahore

- 3rd Semester
- CGPA: 3.42 / 4.00

ACADEMIC PROJECTS

1 Marhaba Chicken Website

A modern restaurant website built with HTML, CSS, JavaScript. Features include menu, cart, wishlist and WhatsApp order integration.

2 Personal Expense Tracker

A full stack MERN application to track income, expenses and visualize spending with charts.

3 CodeUniverse Learning Platform

A learning platform front-end with quiz system and responsive UI.

4 Airline Reservation System (C++)

Console based system to manage flights, bookings and passengers using OOP concepts.

5 Student Gradebook & Result Analyzer (C++)

Program to manage student records, calculate grades and generate results.

6 Food Delivery Database Project

Database design for a food delivery system using SQL with tables for users, restaurants, orders and payments.

CERTIFICATIONS

• WordPress Web Development Training Program (Learning With Earning)

Issued: Aug 2025

• Graphic Designing Training Program (Learning With Earning)

Issued: Aug 2025

ACHIEVEMENTS

- Consistently maintained good academic performance.
- Built multiple real-world projects to strengthen practical skills.
- Passionate about continuous learning and self-improvement.
